DETAILED ACTION

EXAMINER'S AMENDMENT

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it **MUST** be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Robert Frommer on May 29, 2008.

The application has been amended as follows:

In the claims

In Claim 17 replace "A record medium on which a program for recording data to a recording medium has been recorded, the program causing a computer to perform the steps of" with – A computer readable medium embodying a program causing a computer to perform the steps of:

In Claim 18 replace "A record medium on which a program for recording video data to a rewritable optical disc has been recorded, the program causing a computer to perform the steps of" with -- A computer readable medium embodying a program causing a computer to perform the steps of:

In Claim 19 replace "A record medium on which a program for recording audio data to a rewriteable optical disc has been recorded, the program causing a computer to perform the steps of" with -- A computer readable medium embodying a program causing a computer to perform the steps of:

In Claim 20 replace "A record medium on which a program for recording video data and audio data to a record medium has been recorded, the program causing a computer to perform the steps of" with -- A computer readable medium embodying a program causing a computer to perform the steps of:

Allowable Subject Matter

2. Claims 1-3, 7-8, 11-13, 15, 17-20, 22-25, and 28 respectively renumbered 1-17 are allowed.
3. The following is an examiner's statement of reasons for allowance:

Okada et al (US 6,181,870) in view of Abecassis (US 6,208,805) in further view of Modeste et al (US 5,852,800) discloses a recording apparatus and method for recording video and audio data onto a recording medium.

Okada et al discloses a video encoding means for encoding video data in a group structure of a plurality of frames corresponding to a compression-encoding process (Figure 18 shows an encoder in which an inter-frame predictive encoding process and a motion compensative process is met through the MPEG encoder as well being well known in the art); video data output means for outputting encoded video data by said encoding means and audio output means for outputting compression-encoded or non-compressed audio data (Figure 17 shows audio output signal used for outputting all audio data).

It is further taught by Abecassis a control function is inhibited for interfering of the playback of video. The inhibiting provides a control function of playing proper video

segments and thereby contains various file structures within the video data stream. As seen in Figure 3 various file structures contain a first data unit that corresponds to a predetermined number of frames and are thereby encoded by the first data units and described in Column 9 Lines 1-50. Furthermore, Modeste et al further teaches a system that provides a first and second audio and video units as well as management information areas on a disk as seen in Figure 1. Additionally, as described in Column 8 Lines 57+ and continuing on Column 9 Lines 1-50 describes the various areas for data to be contained on the disc. It is further taught in Figures 13-16 the encoded audio and video signals that are stored and processed on the disc as further described in Column 15 Lines 59+ through Column 16 Lines 1-14. However, the prior art of record fails to disclose, teach or fairly suggest the following limitation as recited in claim 1.

“wherein the video track data contains a size quantity of the first video data unit and a start position of the second video data unit and the audio track data contains a size quantity of said first audio data unit and a start position for said second audio data unit respectively.”

4. Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled “Comments on Statement of Reasons for Allowance.”
